In a business so peculiarly personal as that of the nurseryman, the element of confidence plays, perhaps, a more important part than in any other phase of business activity. Necessarily, it is the reputation of the seller that must count most with the buyer. Very largely, he purchases his trees and plants, "sight unseen," for until they begin to leaf out, he has no visual evidence that what he has bought actually has been delivered. Those who have known and bought from the Forest Nursery Company in the past—many for a long term of years—of course, have found the performance the very best evidence of the commanding position of the Forest Nursery Company in its field.
